Freelance

UX / Web Designer

Work on individual projects in a freelance format in combination with educational activities for the Google UX Design Certificate course. I used separate small tasks to develop skills for working through various stages of solving user experience problems. I paid a lot of attention to working methods in Figma. Key areas: analysis of accessibility and usability, visual design, optimization of adaptive layouts. A current example of the implemented design is the home page of the Italian furniture store "Folioro" foglioro.ru - redesign work is currently being carried out.

Additional information

About me

I'm a versatile and creative professional with a diverse background in psychology, data analysis, programming, art and tutoring. As a UX designer, I bring my skills in problem-solving, attention to detail, and artistic expression, which has equipped me with the tools I need to create user-centered designs that are both aesthetically pleasing and effective in achieving their intended purpose. Now I am focused on developing a career in UX design.
